

# NetAlly Legacy Product Replacement

With the release of both the AirCheck™ G3 Pro and the EtherScope® nXG 300 we are replacing many of our NetAlly legacy solutions with new products that support the latest networking technologies and feature many of the functionalities of the previous products.

\*AirCheck G3 and EtherScope nXG 300 models are available in three versions: Full Tri-Band (capability across the entire 6GHz band), Partial Tri-Band (capability for only certain channels in the 6GHz band as determined by 802.11d regulatory domain information), and Dual Band Only (for countries where operation in the 6GHz band is not allowed.) Be sure to select the model that is certified for use in your specific country. Please contact your NetAlly reseller for more information.

The models shown on the table above are for the “Full Tri-Band” version. Replace “AIRCHECK-G3-PRO” or “EXG-300” with the following for the other model types:

**AIRCHECK-G3E-PRO or EXG-300E** Partial Tri-Band

**AIRCHECK-G3C-PRO or EXG-300C** Dual Band Only (2.4/5GHz)

## Inclusion of AllyCare Support

All new AirCheck G3 and EtherScope nXG 300 mainframes are sold with the first year (1 year) of AllyCare support included. Additional year(s) of support may be added. Product registration and activation is required within 30 days of first power-on.
